

REMARKS

The specification has been objected to due to the absence of a statement regarding the prior application. The specification has been amended to obviate this objection.

The specification and drawings have been objected to due to a number of minor informalities. The specification has been amended to obviate the Examiner's objection.

The claims have been rejected under 35 U.S.C. §112, first and second paragraphs. The Examiner has stated that the application would be allowable if the amendments which were filed in the parent application would be included in the present application and the claims would be allowable if rewritten to overcome the rejections under 35 U.S.C. §112. Identical amendments made to the specification and claims in the parent case have now been included in the present application and thus the objections and rejections raised by the Examiner should be withdrawn.

It is respectfully submitted that the claims are now in condition for allowance and an early indication of the same is respectfully submitted.

Respectfully submitted,

Arlene J. Powers
